Italian Espresso Coffee Machine

Carimali machines are extraordinarily reliable and all over the world you will find baristas who will testify to the long life of their Carimali.

The Carimali product range includes traditional and superautomatic espresso coffee machines, coffee beans grinders and accessories.

Dishwashers

A step forward in environmentally friendly products.

Teikos' production is completely designed and manufactured in Italy.

All stages of production are highly controlled. Before the machines leave the factory, they are tested one by one with water, electricity and temperature, to guarantee the Customer strength and longevity, reducing the need for warranty work. Thanks to the standardization of the components, Teikos Dealers are able to act quickly to meet any Customer's needs. A satisfied Customer is a Customer who will always bring in good publicity!

For washing and rinsing, we use high-efficiency pumps, carefully sized, to reduce consumption and respect the environment, with very high performance results.

We have minimized the use of plastic parts, most components are electromechanical, and, upon Customer's request, the technical staff can customize the duration of washing cycles; the thermostats, that manage the temperatures of washing and rinsing, are both adjustable for a perfect set-up. The removal of parts for maintenance and routine cleaning is performed without the use of tools. Our philosophy is to offer the highest quality product without compromising.

Combi Oven

Every day, every week, more and more chefs are choosing UNOX combi ovens and bakeoff ovens. User friendliness, Know-how, product quality, innovation, elegant and functional design make UNOX your first-class alternative to any other massproduced oven.

Only for Professionals

Food Processing Machine

For more than 45 years Sirman has been manufacturing the finest food processing machines for the professional kitchen and retail industry.

From the entrepreneurial idea of the Founder Nereo Marzaro to the present time, Sirman has constantly committed with a high level of organization and teamwork to fulfill the needs of over 500 dealers nationally and 125 countries worldwide with products entirely designed and made in Italy.

Today Sirman is a leader in the industry thanks to the most comprehensive range of food processing machines, designed with a perfect combination of technology and dependability, innovations and solutions to meet and exceed the demands of restaurants, bars, pizzerias, butcheries, supermarkets, laboratories, collectivities and plants. This is the outstanding result of Engineers working every day in high tech departments for the research and development of effective solutions to further expand the line.

The research & development department boasting 12 Engineers with 8 3D modeling stations to manage all stages of the product development process in conjunction to the Sales Force focused on understanding and addressing the rising and ever changing needs of the Customers to create a high-level strategy to be the only global partner in the Italian marketplace and internationally well-recognized.

Company Profile

Established in the year 2015, we "KITCHEN TECH" are a noted organization engaged in manufacturing, supplying, importing a comprehensive array of Imported Kitchen Equipment, Food Processing Equipments and Refrigeration Equipments. We also provide the offered array in customized form. Our products are tested several times on well-defined parameters by our team of quality auditors, enabling us to deliver flawless range.

With the aim to serve our esteemed clients with an error-free range, we are associated with famed vendors of the market from whom we procure all the products. Further, post manufacturing, we make these pass a quality test to ensure these give reliable performance, have resistance against corrosion & abrasion, longer service life, sturdy construction and seamless finish.

We are proud to be associated with the following internationally famous brand
